**In collaboration with the parents and NTPC management, the DAVPS, NTPC, Dadri will provide an educational environment in which all students will maximize academic potential, demonstrate respect for individual differences, prepare themselves for future employment, have opportunities for life-enriching activities and active participants in stewardship of their community as a whole.**

This document was written following an Inset day which involved input from all stakeholders of the school including staff (teaching and non teaching), parents and Student Councils. The document we produced is not a long list of platitudes but is a practical statement of what we wanted the school to look like after Five years. In 2014, we are going to engage in many new processes building up to 2019 where a new vision statement will be launched. Again, every one will have their chance to have an input and we will be setting our sights high.
